About us

Q-Control Engineering is the distributor and solution provider in engineering and electrical, control as well as automatic control systems for industrial application. With the registered capital of 50 million Baht, the company is today armed with the experience, human resource and technology making it a successful player in the field. Presently Q-Control Engineering is the distributor of products under the brand Schneider Electric as well as distributes other high-quality products. We are equipped with a wealth of knowledge in both the product and engineering aspects to service customers with great efficiency.

Vision

Following a rise in the production competition coupled with rapid technological advances, today the manufacturers have raised their bar of expectation on the distributor and solution provider. Therefore our response is to focus on providing value-added products and services to ensure the maximum satisfaction of the manufacturers, who are our customers. To realize this vision, Q-Control Engineering is committed to developing its organization, human resources and technology in addition to continuously sourcing new equipment and servicing customers. These actions will give added benefits to our customers and build up their trust in our product and service.

Mission

- Provide high-quality product and solution services
- Develop the knowledge and experience of the human resource team to enhance service efficiency
- Interact with the customers in providing product and service solutions to achieve maximum benefit
- Deliver efficient service to create maximum satisfaction for the customers

Product & Services

Industrial Equipment

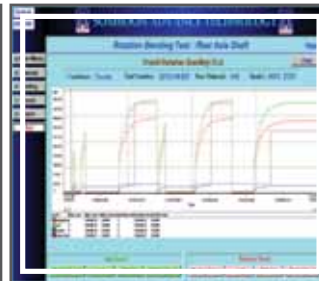

- Schneider (Altivar)
- Schneider (Harmony)
- Lapp Kabel
- Spare Part

Engineering Solutions

Automations, Electical & Control

As the market leader in automation solution provider, we implement integrated and economical automation with worldwide brand.

Turnkey & Renovate (Electrical and Process Automation Trunkey Project) We design engineering, Supply and installation of all electrical and automation equipment since MDB, MCC, PLC, SCADA, INVERTER, SERVO-MOTOR, Ladder, Piping, Sensor and Instrumentations

Q-Control Engineering

With our professional,experienced,Service/ Project team, we are offer.

- PLC and Spare part stock list
- After sale service and Repair
- Design,engineering,programming
- Installation and Commissioning
- Replacement new systems
- Consult, Problem solving and Training

Altivar, Altistart

Variable Speed Drives and Soft Starters

«The high
performance
AC-Drive»

Servo Motor

«Inspired by Simplicity»

Lexium 32
Servo drives and motors
Power range from 0.15 kW to 7 kW

Motion Control
Lexium 23

Fast, simplified engineering
Powerful integration software simplifies the entire process from planning all the way to commissioning to boost efficiency:

- Validated architectures
- Sizing tools
- CAD and cabinet drawings
- Support for PLC open libraries
- User-friendly software SoMachine

Control & Protection

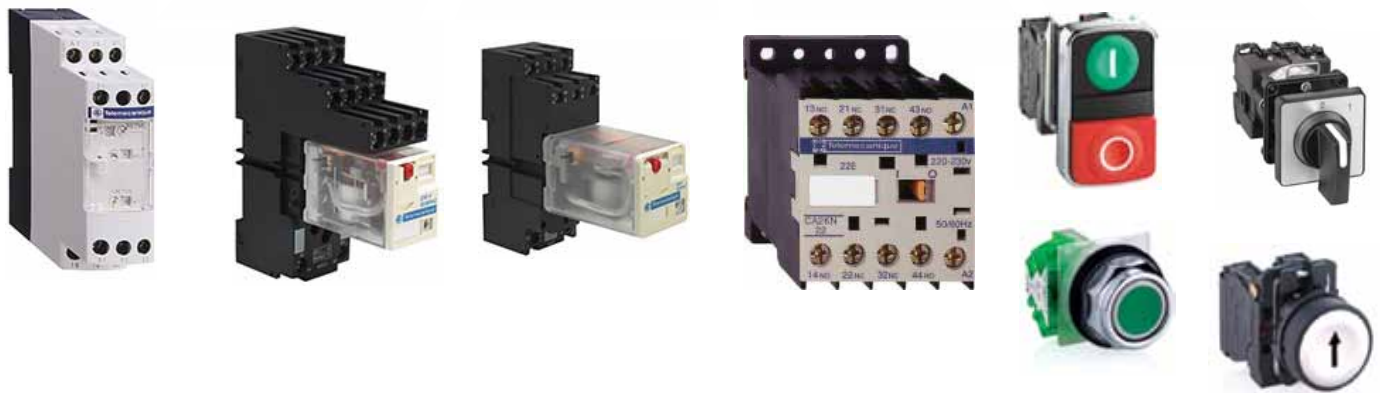

«TeSys Motor Breaker & Motor Starter»

Telemecanique

Control Relay & Plug-in Relay

Magnetic and thermal-magnetic motor circuit-breakers up

- TeSys contactors have been designed for perfect integration in control systems
- They can be used to create motor starters for any type of application.
- Switching contactor or relay coils
- Powering control and signalling equipment
